

Guide on writing proposal

Section	Content
Title page	Title page must contain the project proposal title, candidate name, student ID and the supervisor name Title page must not contain any page number
Abstract	Summarize the proposed research in about 150–200 words. Focus on purpose and motivation for the study, stating the problem, data collection methodology and analysis, significant results and implications of the research proposed. This should be prepared after the proposal content finalized. Page numbering must be roman numbers
Table of content	Provide the page numbers of all the content starting from Abstract to Reference List Page numbering must be roman numbers
Introduction	Provide background information of the research. Discuss about the subject area, background of the scenario, requirement and importance of the research. Properly reference the sources using Harvard referencing style. Do not exceed 500 words. Page numbering must be Hindu-Arabic
Focus of the research	This section must contain two sub sections namely Research questions, Project objectives. Research questions sub section must clearly define the research questions or research hypothesis. Project objectives subsection must discuss key project objectives, resulting goals of the project with reasons or a logical base. Page numbering must be Hindu-Arabic
Methodology	Methodology must include methods and specifications of data collection and analysis, and the materials used with logical reasoning. The specifications must be analyzed to justify them with reasoning. Page numbering must be Hindu-Arabic
Project Schedule	Project schedule must contain the time plan of the project activities (Gantt chart is preferred). Page numbering must be Hindu-Arabic

Project feasibility	Conduct feasibility study (technical, economic and operational) to check viability of the project. Technical feasibility analysis should contain technical resource analysis and technical competence analysis. Technical resource analysis should contain the resource estimation with procurement capability. Technical competence feasibility should discuss on necessary core competencies. Economic feasibility should estimate the cost and discuss on viability of the project based on the source of funding. Operational feasibility section should discuss other operational related aspects such as security clearances, approvals and etc. This does not have to be a very lengthy section but analyzed in tables or discussed in point forms. Content of this section is considered as evidence for a comprehensive proposal which is the requirement of D1 criteria. Page numbering must be Hindu-Arabic
Ethical Considerations	This section must contain the ethics approval obtained from ethics committee if research has to be approved by an ethics committee to make sure the compliance with the rules and expectations with which the research should be conducted. Project becomes 'high-risk', if it involves people, animals, or sensitive materials. Page numbering must be Hindu-Arabic
Reference list	List all the sources cited (in text referencing) in research proposal in alphabetical order using Harvard referencing. Page numbering must be Hindu-Arabic
Authenticity declaration form	Attach a scanned copy of the completed and signed authenticity declaration form.

Referencing

Harvard referencing style must be used for both in text-citation and reference listing. Detailed referencing guide is given in below link.

Style Guide

Page layout	Size is A4 Margins Normal
Title	Font is Cambria 26 Text left aligned
Sub title	Font is Cambria 16 Text left aligned
Textual content	Font is Times New Roman 12, 1.5 line spacing Text alignment justified (content aligned to both left and right) Paragraphs properly separated
Figure	Every figure must be numbered & named (see the sample below) Figures must be referenced if extracted from a source Figures are centered
Table	Every table must be numbered & named (see the sample below) Tables must be referenced if extracted from a source Tables are centered

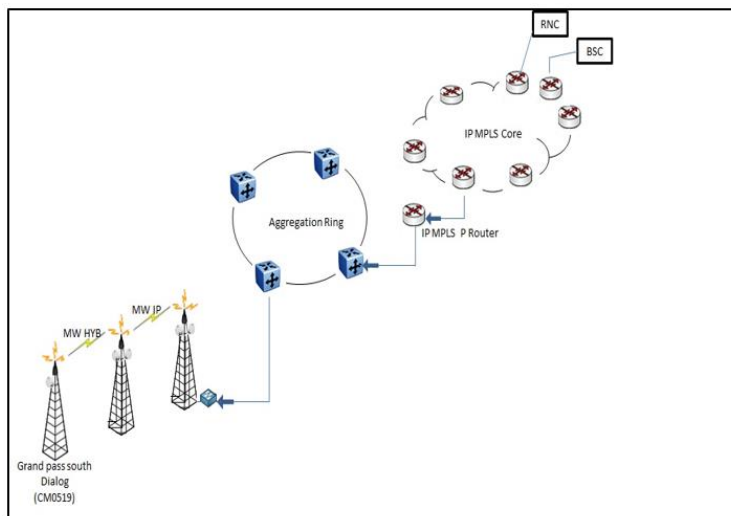

Figure 3.1: New Transport Network Architecture

Transport Layer	Functionality	Vendor	EMS
Core	IP/MPLS P routers	Huawei	U2000, u Traffic
	IP/MPLS NGN routers	Huawei	U2000, u Traffic
	IP/MPLS Business Core	Cisco	Cisco Prime
Aggregation	DWDM Network	Huawei	U2000, u Traffic
	Metro Network (one ring)	Huawei	U2000, u Traffic
	Metro Network (four rings)	Cisco	Cisco Prime
Access	Cell Site Routers	Huawei	U2000, u Traffic
	Cell Site Routers	Cisco	Cisco Prime
	Microwave	Huawei	U2000
	Microwave	Ericsson	SO-EM
	Microwave	NEC	PNMSJ

Table 2.1: Vendor and technology mix of the transport network.
